

Director of Informatics

PreventionGenetics is a rapidly growing Clinical DNA Testing company located in Marshfield, Wisconsin. We are seeking applicants for the position of Director of Informatics.

This position requires a minimum of a Master's degree in computer science, statistical genetics, medical informatics, computational biology or a related field, and a minimum of 10 years experience in the field of biomedical informatics.

The Director of Informatics will lead a growing team of programmers, analysts, and database and hardware experts. The long term goal of this team is to enhance interpretation of patient DNA sequences as a vital step toward health care quality improvement. Job duties will include developing concrete departmental objectives, taking responsibility for achieving these objectives, coordinating and supervising the day to day activities of informatics staff, and providing general informatics expertise.

We offer a highly competitive salary and an excellent benefit package including: health, dental, disability, and life insurance, 401k, profit sharing plan, and a fitness incentive plan.

Marshfield, located in central Wisconsin, offers a pleasant living and working environment. It provides an excellent choice of public and private schools and affordable housing. Marshfield is also home to a large medical center that includes St. Joseph's Hospital, the Marshfield Medical Research Foundation, and the Marshfield Clinic.
