

PRENATAL TESTING GUIDELINES AND TEST REQUISITION FORM

PreventionGenetics should be notified in advance of arrival of a prenatal specimen. For all prenatal testing in ongoing pregnancies, we require a signature from the health care provider on our "PRENATAL HEALTH CARE PROVIDER'S STATEMENT," which is included on page 2. We expect that the ordering provider will take responsibility for the appropriateness of the requested testing.

We accept fetal DNA, fetal tissue, cultured fetal cells, or direct CVS/amniotic fluid. However, acceptable specimen type is dependent on the fetal testing requested (see page 7 for more information). Retention of a backup culture of the fetal cells is strongly recommended. Where possible, please ship cultured cells so that they will arrive at PreventionGenetics no later than Thursday in the work week. PreventionGenetics offers cell culture (see below for details).

We require at least one parental specimen be sent as part of prenatal testing for QA purposes.

Maternal cell contamination (MCC) of fetal sample will be tested using the PreventionGenetics DNA Genotyping Panel. Even in cases of autosomal dominant disorders in which the father has the causative variant, blood or DNA from the mother is strongly encouraged to be sent for the MCC test. We do not charge extra for MCC studies for any fetal testing, but the CPT Code, 81265, will be included on invoices and insurance claims as appropriate.

At this time, PreventionGenetics is not validated to offer prenatal testing for MLPA or repeat expansion testing. We cannot offer whole exome sequencing (WES) for ongoing pregnancies. PreventionGenetics does not perform prenatal testing for sex. We will also not report fetal sex unless this is critical for interpretation of test results. PreventionGenetics does not perform pre-implantation DNA testing.

FAMILIAL VARIANT TESTING TEST CODE 990, \$990

Familial variants must be known in advance from testing of parents, affected siblings or other relatives. These variants must be confirmed at PreventionGenetics in the parents and/or proband. Parental specimens

may be sent in advance of the prenatal specimen. Additional CPT codes for parental and MCC testing may be included at time of invoicing. We require at least one parental specimen be sent for all targeted prenatal testing requests. **Turnaround Time:** 8-10 calendar days from receipt of specimen and signed PROVIDER'S STATEMENT.

NEXTGEN SEQUENCING FOR ONGOING PREGNANCY

see standard prices listed on our website

We will perform NextGen tests for ongoing pregnancies. **Turnaround Time:** The great majority of NGS tests are completed within 28 days from date of specimen and signed PROVIDER'S STATEMENT receipt. Our formal STAT option is not available. We will courtesy prioritize requests related to ongoing pregnancies.

FULL GENE SANGER SEQUENCING FOR ONGOING PREGNANCY

see standard prices listed on our website

We will perform full gene Sanger sequencing tests for ongoing pregnancies. **Turnaround Time:** The great majority of Sanger tests are completed within 18 days from date of specimen and signed PROVIDER'S STATEMENT receipt for a single gene. Our STAT option is available for a 25% additional charge. The great majority of STAT requests are completed within eight calendar days. If we are unable to complete STAT requests within 10 days, the surcharge will be waived. We will courtesy prioritize requests related to ongoing pregnancies.

DELETION / DUPLICATION ANALYSIS VIA GENE-CENTRIC ACGH TEST

see standard prices listed on our website

We will perform gene-centric aCGH for prenatal specimens. See our full Test Description for details and limitations. At this time MLPA is not validated for prenatal specimen types. If a copy number variation (CNV) was identified via gene-centric aCGH and was confirmed by PCR in the proband, the PCR-based test is an option for a subsequent pregnancy only when the father

is a carrier of the CNV. When the mother is a carrier, prenatal testing must be performed by aCGH due to the possibility that even a low level of maternal cell contamination may affect the interpretation of a PCR-based test. Please contact our genetic counseling team to discuss any familial CNV situations. **Turnaround Time:** The great majority of gene-centric aCGH tests are completed within 14 days from date of specimen and signed PROVIDER'S STATEMENT receipt. Our STAT option is available for a 25% additional charge. The great majority of STAT requests are completed within eight calendar days. If we are unable to complete STAT requests within 10 days, the surcharge will be waived. We will courtesy prioritize requests related to ongoing pregnancies.

DELETION/DUPLICATION ANALYSIS VIA CHROMOSOMAL MICROARRAY VIA ACGH AND SNP TEST

see Del/Dup Array Tests

We will perform Rapid Prenatal Chromosomal Microarray (Test Code 3780, \$1390) or Whole Genome Chromosomal Microarray- Prenatal (Test Code 2200, \$1390). See our full Test Descriptions for details and limitations. Maternal cell specimen is required. For Rapid Prenatal CMA, please use Prenatal Rapid CMA Test Requisition Form.

TESTING IN CASES OF FETAL DEMISE OR PREGNANCY TERMINATION

see standard prices listed on our website

In the case of fetal demise or pregnancy termination, no "PRENATAL HEALTH CARE PROVIDER'S STATEMENT" is required.

FETAL CELL CULTURE

Fetal cell cultures are available from direct amniotic fluid, chorionic villi, or products of conception (POC) via Test Code #995 (cost \$250). Collect 10 ml -20 ml of direct amniotic fluid or 5 mg -10 mg cleaned CVS tissue (~15-20 cleaned villi) or 2mm x 2mm x 2mm fresh tissue (saline or culture media at room temperature). CPT code 88235 for amniotic fluid/chorionic villi or 88233 for POC specimens.

PRENATAL HEALTHCARE PROVIDER'S STATEMENT

This statement is required and applies to all cases of ongoing pregnancy.

MOTHER'S INFORMATION

LAST (FAMILY) NAME	FIRST NAME	MI	MOTHER'S DATE OF BIRTH ____/____/____ <small>MONTH DAY YEAR</small>
--------------------	------------	----	---

My signature below indicates all of the following:

- I take responsibility for the appropriateness of the requested testing.
- I have explained the purpose of the prenatal testing I have requested.
- I have provided appropriate genetic counseling to my patient.
- I have given the opportunity for the patient to ask questions.
- I am responsible for obtaining written or verbal informed consent (ensuring my patient understands risks, benefits and limitations of the testing and the implications of the results).

HEALTHCARE PROVIDER SIGNATURE

DATE

FOR NY SPECIMENS ONLY: Retention of Unused DNA

PreventionGenetics' general policy is to retain all excess DNA from patient testing indefinitely. This allows for easier ordering of additional testing in the future and saves considerable phlebotomy and shipping costs to the patient and healthcare system. Excess DNA specimens can also be used for quality control measures. New York (NY) law requires patient consent in order to retain excess DNA beyond 60 days. If patient specimen was collected in NY and this statement is not signed, excess DNA will be discarded 30 days after testing is completed.

I have obtained consent from my patient for PreventionGenetics to retain unused DNA for potential future testing ordered by her healthcare provider and for quality control testing.

TEST SELECTION

FETAL TEST SELECTION

List below the tests that are to be performed. If targeted testing, please include details. For other tests, the Test Numbers and Names can be obtained from our web site. Please include any special instructions in the comments section. The tests will be performed in the order listed unless otherwise specified. Unless requested, we will run Sanger panels sequentially as listed in our test descriptions.

We offer a STAT option for Sanger sequencing and gene-centric aCGH. The great majority of STAT tests are completed within 8 calendar days. If we are unable to complete STAT requests within 10 days, surcharge will be waived. NextGen panels are not available to be ordered STAT. All testing related to an ongoing pregnancy is courtesy expedited. We require at least one parental specimen be sent for prenatal testing. SEE PRENATAL GUIDELINES FOR MORE INFORMATION.

SELECT TEST OF INTEREST OR FILL IN DESIRED TEST CODE

TEST CODE	TEST NAME	GENE(S)	VARIANT(S)

As the ordering Healthcare Provider, I confirm I have obtained the patient's informed consent, either verbally or in writing, to perform this test. I further confirm the patient has been appropriately counseled and understands the risks, benefits, and limitations of this genetic testing and the implications of the results.

BILLING - PLEASE SELECT INSTITUTIONAL OR SELF-PAY WITH OPTION TO SUBMIT TO INSURANCE

PATIENT TESTING WILL BE DELAYED UNTIL ALL OF THE BILLING REQUIREMENTS HAVE BEEN MET. PLEASE PRINT CLEARLY.

If the patient's specimen is collected in New York, a New York State Non-Permitted Laboratory Test Request approval letter (where applicable) and Genetic Testing Healthcare Provider Statement (see website) must be included before testing will proceed.

SPECIMEN REQUIREMENTS AND TURNAROUND TIMES (TAT)

PREVENTIONGENETICS PREFERRED SPECIMEN TYPES

PLEASE CONTACT US WITH ADDITIONAL SPECIMEN REQUIREMENT QUESTIONS.

STAT TAT (8-10 calendar days) available at a 25% surcharge for Sanger Sequencing and aCGH. Cannot be guaranteed for aCGH.

WHOLE BLOOD

Collect 3 ml - 5 ml of whole blood in EDTA (purple top tube) or ACD (yellow top tube), minimum 1 ml for small infants.

DNA

Send in screw cap tube at least 5 µg -10 µg of purified DNA at a concentration of at least 20 ng/µL for NGS and Sanger tests and at least 5 µg of purified DNA at a concentration of at least 100 ng/µL for gene-centric aCGH, MLPA, and CMA tests, minimum 2 µg for limited specimens. Indicate concentration on tube label. For requests requiring more than one test, send an additional 5 µg DNA per test ordered when possible.

SALIVA

Oragene™ Saliva Collection kit used according to manufacturer instructions.

FETAL (CVS/AMNIOCYTES) AND OTHER CELL CULTURES

Culture and send at least two, T25 flasks of confluent cells. For sequencing or gene-centric aCGH panels, two flasks are often sufficient; however, some panels may require additional flasks (dependent on size of genes, amount of Sanger sequencing required, etc.). Multiple test requests may also require additional flasks. Please contact us for details. We strongly recommend maintaining a back-up culture.

Fetal cell cultures are available at PreventionGenetics from direct amniotic fluid, chorionic villi, or products of conception (POC) via Test Code #995 (cost \$250). Collect 10 ml - 20 ml of direct amniotic fluid or 5 mg - 10 mg cleaned

	Chromosomal Microarray (CMA)	★	★	■	★	★	—	■	—	20 days

EXCEPTIONS

- A - Cell cultures and DNA extracted from CVS and amniocytes not accepted for MLPA; DNA extracted from saliva (except test #1941) also not accepted.
- B - Cell cultures and DNA extracted from CVS and amniocytes acceptable for PGxome for non-ongoing pregnancies only.
- C - Direct prenatal specimen types most appropriate for targeted prenatal familial variant testing (Test Code #990), and strongly discouraged for full gene and panel tests. Back-up culture highly recommended.
- D - Semen: Collect 1-2 vials and flash freeze. Vials to be sent frozen (preferably on dry ice). Contact us for details.

KEY

- ★ PREFERRED
- ACCEPTED
- NOT ACCEPTED

CVS tissue (~15-20 cleaned villi) or 2mm x 2mm x 2mm fresh tissue. CPT code 88235 for amniotic fluid/chorionic villi or 88233 for POC specimens.

FRESH, FROZEN TISSUE

Collect 2mm x 2mm x 2mm tissue and flash freeze. Tissue to be sent frozen (preferably dry ice). Contact us for additional details.

BUCCAL SWABS

Buccal swabs are most appropriate for targeted, known

variant testing. Collect 3-6 buccal swabs for targeted, known variant testing and 10-20 buccal swabs for sequencing of full gene(s).

DIRECT AMNIOTIC FLUID/CHORIONIC VILLI

Collect 10 ml -20 ml of direct amniotic fluid or 5 mg -10 mg cleaned CVS tissue (~15-20 cleaned villi). We strongly recommend maintaining a local back-up culture. Fetal cell cultures available (Test Code #995, \$250).

SHIPPING & HANDLING INSTRUCTIONS

Please label all specimen containers with the patient's name, date of birth and/or ID number. At least two identifiers should be listed on specimen containers. We accept specimen deliveries Monday-Saturday for all specimen types except cell cultures, direct amniotic fluid, or direct chorionic villi. Cell culture deliveries are routinely accepted Monday-Thursday and require advance notice of arrival. If a Friday or Saturday delivery is necessary, please contact us to make arrangements. Saturday delivery should especially be avoided when possible as prenatal specimens are not processed over the weekend. Holiday schedules will be posted on our home page at least one week prior to major holidays.

BLOOD

DO NOT FREEZE. During hot weather, include a frozen ice pack in the shipping container. Place a paper towel or other thin material between the ice pack and the blood tube. In cold weather include an unfrozen ice pack in the shipping container as insulation. At room temperature, blood specimen is stable for up to 48 hours. If refrigerated, blood specimen is stable for up to one week.

DNA

DNA may be shipped at room temperature. Label the tube with the composition of the solute, DNA concentration as well as the patient's name, date of birth, and/or ID number. We only accept genomic DNA for testing. We do not accept products of whole genome amplification reactions or other amplification reactions.

CELL CULTURES, DIRECT AF/CVS, AND POC

Send specimens overnight in an insulated, shatterproof container. Direct AF/CVS or POC specimens can be sent in saline or culture media at room temperature for culturing at PreventionGenetics (Test Code #995, \$250).

ADDRESS

Diagnostic Lab
PreventionGenetics
3800 S. Business Park Ave.
Marshfield, WI 54449
USA

TESTING KITS

Clinical testing kits with prepaid return shipping are available for U.S. Clients. We are able to provide clinical testing kits to International clients without the return postage. To order test kits, submit requests through our electronic order form (see website) or contact our Client Service Representatives at (715) 387-0484, ext. 0.

PRENATAL TESTING

Please sign Prenatal Healthcare Provider's Statement for ongoing pregnancies and contact us in advance regarding prenatal test requests. When possible, ship prenatal samples to arrive at PreventionGenetics no later than Thursday.

DNA GENOTYPING PANEL

For quality control purposes, the PreventionGenetics DNA Genotyping Panel is performed on all clinical specimens. Genotyping results are not included in test reports.

DNA BANKING

DNA Banking has a reduced price of \$98 for patients if clinical testing is also being performed at PreventionGenetics. Visit our website at www.PGDNABank.com for information about the process and forms. For questions related to PGDNABanking, contact our DNA Banking Director at (715) 387-0484, ext. 151, or email: dnabanking@preventiongenetics.com.

CONTACT US

For additional questions or concerns, please contact our Client Service Representatives at (715) 387-0484, ext. 0, or our Genetic Counseling Team at option 2, or email: clinicaldnatesting@preventiongenetics.com.
